PROFESSIONAL SUMMARY

Odoo techno-functional consultant with 4+ years across operations and ERP, seeking senior Odoo consultant, functional lead and team lead roles. I take client requirements through Odoo 19 configuration, custom development in Python, XML and QWeb, test cases, user guides, training and handover. As a team lead in operations, I handled a team of 24+, tracked team KPIs and quality reports, owned compliance, and worked directly with managers and high-profile clients. Certified in Project Management Fundamentals (IBM SkillsBuild).

CORE SKILLS

Functional: Requirements gathering, business process analysis, Odoo 19 configuration, requirement and design documents, data migration support, functional testing, user guides and training

Technical: Python, Odoo ORM, XML views, QWeb, OWL, SCSS, PostgreSQL, security and access rights, wizards, PDF and Excel reports, custom dashboards

Odoo apps: CRM, Sales, Purchase, Inventory, Manufacturing, Invoicing, Accounting, Project, Timesheets, Employees, Recruitment, Time Off, Attendances, Website, eCommerce, Events, POS

Tools: PyCharm, Salesforce, ServiceNow, BoldDesk, Zoho CRM, SAP, Excel, Google Sheets

Leadership and operations: Team handling, ticket system management, compliance and QA checks, incident resolution, process improvement, project management fundamentals

PROFESSIONAL EXPERIENCE

Odoo ERP Associate **Aug 2025 – Present**

Bluzee IT Consultant and Services

- Configure Odoo to agreed client workflows and document requirements and design decisions.
- Write test cases and user guides for every project, and support functional testing, data migration and user issues.
- Delivered the Event Booking System, a four-module Odoo 19 solution validated with 52 manual test cases.
- Built a Student and Course Management module with four wizards and five PDF reports.

Product Executive, Operations **Jul 2023 – Jul 2025**

Revolute Software

- Led and handled a team of 24+ as team lead, owning day-to-day operations and support delivery.
- Tracked team members' KPIs and prepared quality reports.
- Took care of compliance and led QA and compliance checks with 98% accuracy.
- Handled high-profile clients as team lead, working directly with the manager and attending regular meetings.
- Managed 50+ tickets a day through ticketing systems including ServiceNow and BoldDesk.
- Improved process efficiency by 25% and cut critical incident resolution time by 30%.
- Recognised as Employee of the Month six times.

IT Recruiter **Nov 2021 – Aug 2022**

Focus Organization

- Sourced and screened candidates for technical and non-technical roles, and selected profiles matching client requirements.
- Coordinated candidates through interviews with the hiring companies, including preparation and scheduling.
- Submitted complete candidate profiles to the account manager, from where they moved to HR for payroll and onboarding steps.
- Placed 20+ candidates within tight deadlines.

PROJECTS

BizPulse **2026**

Python, XML, QWeb, OWL, Chart.js, PostgreSQL, PyCharm

- Built an eight-module suite that installs from a single meta-module, covering Sales, CRM, HR, dashboards, reports and an AI assistant.
- **Sales:** discount approval workflow, sales targets and commission rules.
- **CRM:** explainable rule-based lead scoring, next best action, capacity-aware smart lead assignment and a daily scheduled scoring job.
- **HR:** 30-day attendance insights, late-arrival tracking and an availability helper combining leave and check-in data.
- **Dashboard and reports:** role-aware OWL dashboard with Chart.js; one wizard producing seven PDF (QWeb) and Excel reports for today, week, month, quarter or custom periods.
- **AI layer:** provider-agnostic gateway for Ollama, Gemini and Groq with a full audit log. Ask Pulse turns natural-language questions into validated domains against a model and field whitelist, runs as the current user and never writes data. Morning Pulse sends a daily briefing.
- Wrote manual test cases and a user guide, and documented setup, design rules and known limits.

Event Booking System **2025**

Client project, Odoo 19 Community

- Delivered four connected modules from requirements to handover, covering requirements, design, development, testing and the user guide.
- **Booking Studio:** guided booking that starts with choosing the venue, with venues and seating, a pipeline from quotation to confirmed and done, payments and check-in.
- **Invoicing:** deposit and final invoices linked to Accounting.
- **Insights:** money overview, overdue payments, daily sheet, a dashboard and a PDF Booking Analytics Report covering bookings, seats, payments and venue performance.
- **Smart Assistant:** reads a typed booking request and suggests free dates, offline.
- Wrote the requirement and design documents, 52 manual test cases and the user guide.

Student and Course Management **2025**

Odoo 19

- One module for students, courses, batches, enrollments, marks and fees.
- Four wizards (enrollment, fee collection, promotion, messaging) and five PDF reports (marksheets, admission confirmation, fee receipts, ID cards, course lists).
- Wrote test cases and a user guide.
